

POLY CANVAS BANNER CONSTRUCTION

It has been "Banner Up's!" goal for over 35 years to manufacturer the best light pole banner on the market today. Producing over 2 Million light pole banners since 1982, we are proud of our quality and commitment to make sure we deliver the best product, every time.

Our NEW Poly Canvas Light Pole banners manufactured by "Banner UP!" are the strongest in the industry. We have pioneered the product and coupled it with a Unique Ink System that out lasts our competition by years. Because of our research and dedication to quality we are proud to Guarantee our Poly Canvas Pole Banners 4 years for ripping and fading. see full warranty (Down load guaranty from site)

1. Our Poly Canvas is printed one side and sewn back to back with a 10oz vinyl liner for opacity and strength.

2. Our #2 Heavy Duty Spur Grommets are placed through 6 layers of material in the hem to make sure they stay locked in place.

3. 1/2 " Double Needle lock stitches are used to hem sides and pockets in every banner for superior outdoor durability.

4. Printed with special ink system that creates beautiful Vibrant colors.

BRACKETS

WindSAVER Bracket
Ideal for decorative small-profile light poles

Our WindSAVER Light Pole bracket is being offered as an alternative to the BannerMASTER bracket shown below. There may be times when a more economical bracket just makes sense. The WindSAVER is a non-adjustable bracket. It has the same removable arm feature as the BannerMaster but is secured with a Cotter Pin. It is the ideal choice for Small Profile/Decorative Light Poles if banners are 30" x 72" or smaller

BannerMASTER Bracket
Adjustable bracket designed to flex with a heavy wind load

Our time-tested BannerMASTER Light Pole bracket offers the feature that allows your banners to be tightened and adjusted without removing the plates from the light pole. The BannerMASTER arms adjust up and down 2.5". Making normal maintenance an easier task and saving the cost of replacement hose clamps or stainless steel banding or buckles.

All BannerUp Light Pole Brackets have been jet engine wind load tested for success up to 77 mph sustained winds. Arms are always removable for those times you do not have banners on display. All hardware for installation is included in the cost for both the "SAVER" and the "MASTER" brackets. We can also custom manufacture brackets to fit difficult pole configurations. Just ask your distributor for pricing and lead times.

Customize:

All of our stock designs can be customized to fit your needs. Change the size, color or drop in your message. Almost anything can be achieved, just ask your BannerUp Representative.

Custom Banners and Brackets:

At BannerUp, Custom banners and brackets are what we do best. Tell us your ideas and let us guide you through the best materials to fit your needs. Send us your ideas and let our graphic design staff create a beautiful design for you. We will create a couple of designs for you to choose from and send a PDF proof for approval before production begins. (Art charges may apply)

Need money to pay for your banners and brackets? Consider a banner sponsorship program. The idea is very simple, easy to get going and will create a revenue stream that continues to pay for your banner program. Let us create a few great designs that compliment your area. Approach the local merchants and businesses and sell advertising at the bottom of the banners. They can fly their names proudly sponsoring the banners 24/7 for a fraction of the cost of a newspaper or magazine ad. You get a banner program that helps your community stand out and get noticed. Ask your BannerUp representative how to get started.

Light Pole Banner Materials:

Vinyl:

We digitally print on only the best 18oz block out vinyl with our special twisted scrim embedded in the vinyl to add superior strength. It has been time tested for over 35 years in the field and is one of the best we have ever found. Our block out vinyl also has a matte finish so you don't get that high glossy glare like traditional vinyl.

Sunbrella Fabric:

Some of our stock designs can be silk screened on sunbrella fabric for that traditional look. Sunbrella is a wonderful material for simple spot color designs. The fabric carries a 5 year guarantee on color retention and will resist rot and mildew. Please ask your BannerUp representative about this process.

Poly Canvas: (Exclusive)

We are very excited to offer this exclusive product through our BannerUp representatives. We have over 35 years experience in the light pole banner industry and we are proud to say we feel this is the strongest banner material on the market today. We are so confident about our Poly Canvas banner material that we offer 4 year guarantee on color retention and banner failure when properly installed on BannerUp brackets or approved equal. Ask your BannerUp representative for a copy of our written guarantee.
